

Frequently Asked Questions about the SomnoMed MAS™

When is it worn?

The SomnoMed MAS™ is only worn at night. The SomnoMed MAS™ is unique in that, unlike other oral appliances, it allows you to close your lips, so no one need know you are wearing it.

Is it comfortable?

You won't find a more comfortable MAS. Why? Because it is custom-made to fit your mouth and it does not impinge on your tongue. You can open and close your mouth normally.

Is there a warranty?

Yes. The SomnoMed MAS™ offers a one year warranty against breakage and manufacturing defects, which means you can have full confidence in the product.

What if I have a bridge or denture?

Patients with crowns or bridges can be successfully fitted with the SomnoMed MAS™. Adjustments are made in the appliance to ensure that fragile crowns and bridges are not harmed.

Patients with partial dentures may be successfully fitted with the SomnoMed MAS™ as long as there are enough teeth to anchor the device. Ask your dentist if you are dentally appropriate for the SomnoMed MAS™.

What will the dentist do?

The dentist will thoroughly examine your teeth and mouth and may use X-rays to confirm your oral health status, as well as ensuring that you are dentally appropriate for the device. Dental impressions are required to fabricate a SomnoMed MAS™. They are taken, and sent to our laboratory where the appliance is made. Once custom made for you, the appliance will be inserted by a Dentist who will show you how to insert and remove it yourself, as well as how to clean and care for it.

How effective is the SomnoMed MAS™?

One of the major advances offered by the SomnoMed MAS™ is improved patient compliance. The ability to freely open the mouth, speak, and drink with the device fitted, is a big step forward in this type of medical treatment.

- 96% of patients with proven OSA stated they would like to continue to use the SomnoMed MAS™
- 91% of patients reported substantial improvement in sleep quality with the SomnoMed MAS™
- 87.5% of patients reported nightly use of the SomnoMed MAS™

SomnoMed MAS™

The clinically validated
treatment of snoring
and mild to moderate
Obstructive Sleep Apnea (OSA).

SomnoMed

The SomnoMed MAS™ is a Mandibular Advancement Splint (MAS) that treats snoring and mild to moderate OSA by moving the lower jaw forward slightly. This forward movement tightens the soft tissue and muscles of the upper airway, which prevents obstruction of the airway while you sleep. The tightening created by the device also prevents the tissues of the upper airway from vibrating as air passes over them – the most common cause of loud snoring.

The SomnoMed MAS™ is a custom-made device, consisting of upper and lower dental plates with a unique patented fin-coupling component, which allows normal mouth opening and closing. The device is adjustable which improves the efficacy and comfort level of treatment, as the jaw is moved only as far as is required to alleviate the condition. The SomnoMed MAS™ design has a number of key features that are significant improvements on existing MAS oral appliances. These improvements make the device both comfortable and effective.

The SomnoMed MAS™ is a highly effective solution, for the majority of patients, to the problem of loud snoring and mild to moderate OSA.

Its exceptional levels of patient acceptance and compliance, and treatment efficacy are backed by a large body of clinical research.

Patient compliance with prescribed OSA Therapy is critical to successful treatment. The features and benefits of the SomnoMed MAS™, some illustrated below, are critical to patient compliance and successful treatment of mild to moderate OSA.

Features and Benefits

- Permits normal mouth opening
- Allows speech & drinking
- Full lip-seal
- Easily adjustable
- Safe & effective
- Clinically validated
- Custom-fitted

“...I am having a fantastic result, and I am sleeping better than I have in years; showing decreases in snoring, reflux and ‘naps’ on the interstate. With a paternal family history of premature death due to apnea related chronic disease, this really hits home.”

Dr. Tim Burke, DMD, Pennsylvania

“I am writing to thank you a million times for saving my marriage and my life quite literally. Having been diagnosed with sleep apnea a number of years ago, I, along with my wife, had suffered through countless sleepless nights...”

Ken Calvin, Illinois

“This is great! It has taken me, 7 years to find something that would stop my snoring. It not only stopped my snoring, but has also relieved my TMJ. This is the best thing ever!”

Deborah Ownby, Texas

“I travel a lot with my job and the CPAP was always my carry on plus I would have to make sure I had water to put into the machine. Often the electrical plug would be on a different side of the bed than what I was used to and I had to sleep on the ‘wrong’ side of the bed...”

Rachael Evans, Ohio

SomnoMed MAS™

- Successful treatment of snoring and mild to moderate OSA
- Unrivaled patient acceptance and compliance
- Clinically validated for the treatment of snoring
- One year warranty

Improved Sleep Quality for you and your Family
